EXPERTISE

LANGUAGES

Java/J2EE · Python

DATABASES

RDBMS · MongoDB · Neo4J · Snowflake

FRAMEWORKS

Spring Boot · Hibernate · JPA · FastAPI

CLOUD & TOOLS

AWS · Azure · Jenkins · EKS · Databricks · NiFi · Qlik Sense · Metabase

EDUCATION

B.Tech in CS & Technology
West Bengal University of Technology
2011 - 2015

PROFILE

Back-end engineer specializing in building end-to-end applications with **10+ years** of relevant IT experience. Proven track record working with product teams across Pharmaceuticals, Consumer Staple, HRMS, Tech-Ed, and BFSI domains. A design-minded developer with strong communication, interpersonal, and problem-solving abilities.

WORK EXPERIENCE

SENIOR JAVA FULLSTACK DEVELOPER

BayOne Techno Advisors,Pvt Ltd | Oct 2024 – Present

Client: Albertsons Companies, Inc.
State-of-the-art platform catering to individual needs through Deep Learning to provide a personalized shopping experience.

- Creating REST endpoints to serve complex business requirements for personalized user flows.
- Integrated APIs using **FastAPI** in Python to significantly accelerate response times.
- Introduced **Prometheus** configurations to track performance metrics, visualized through **Grafana** dashboards.
- Proactively managed security using **Snyk** to identify and remove critical and high vulnerabilities.
- Developed a **dynamic configuration engine** that leverages RESTful APIs to deliver personalized product recommendations based on historical consumer data, enhancing user engagement.

PRODUCT DEVELOPMENT ENGINEER II

Calibo India Pvt Ltd | Apr 2021 – Oct 2024

Project: LAZSA Platform (PPaaS)
Integrated Business Digital Platform accelerating innovation cycles.

- Created REST endpoints and implemented NiFi Integration for diverse templates (Kafka, Snowflake, Hadoop, MySQL).
- Introduced Metabase and Open-Refine using Docker containers for visualization and data transformation.
- Implemented AWS S3 integration using SDK and app visualization in Qlik-Sense.
- Developed DevOps pipelines using Jenkins CI/CD and deployed microservices in EKS Clusters.
- Developed Python notebook templates for Kinesis Stream to S3 and Python wheel packages for Databricks.
- Optimized security by removing critical and high vulnerabilities using Snyk.

SENIOR ENGINEER

Altimetrik India Pvt Ltd | July 2015 – Mar 2021

Integrated Business Development Platform (BDP)
Low Code/No Code platform for Developer Productivity.

- Worked on Agile Integration using JIRA and Trello APIs.
- Integrated Metabase and Qlik Sense for dashboard visualization.

Playground (HRMS)
Talent grooming and transformational initiative platform.

- Created orchestration layers in Node.js to bridge UI and backend services.
- Integrated AWS SDK and SDFC Sandbox APIs for cloud workspace management.
- Optimized developer productivity by provisioning cloud-based workspaces using AWS Workspaces and Eclipse CHE, reducing local hardware dependency.

Platform-API E&M (RESTful Services)
Microservices architecture with Spring Boot & Neo4j.

- Integrated Phabricator for Git functionalities.
- Built components with Spring Boot microservices and Neo4j Graph DB.

AltiFin - Paysa (BFSI Remittance)
Remittance application for rural populations.

- Integrated with RBL and Axis Bank APIs for fund transfers.
- Developed Angular components for interaction with REST services.

ACHIEVEMENTS

CORPORATE AWARDS
Multiple Inspire & Integrity Awards. Gem Award at Calibo. Spot Award at Altimetrik.

HACKATHONS
Winner of College Hackathon for Organ Donation enterprise application.

INTERNATIONAL EXPERIENCE
Visited Uruguay for business meet and peer-programming with international teams.
