EXPERTISE

LANGUAGES

Java/J2EE | Javascript | Python

DATABASES

RDBMS | MongoDB | Neo4J | Snowflake

FRAMEWORKS

Spring Boot | Spring Webflux | Hibernate | Mockito | FastAPI

ARCHITECTURE

Microservices | Event-Driven | DDD / Clean Architecture | System Design (HLD/LLD)

CLOUD & TOOLS

Github-Copilot | AWS | Azure | Jenkins | Grafana | Databricks | NiFi | Qlik Sense | Metabase

EDUCATION

B.Tech in CS & Technology
West Bengal University of Technology
2011 - 2015

PROFILE

Back-end engineer specializing in building end-to-end applications with **10+ years** of relevant IT experience. Expert in architecting scalable distributed systems using **Java/Spring Boot** and **Cloud-native patterns (AWS)**. Proven expertise in leading digital transformation across Pharmaceuticals, Consumer Staple, HRMS, Tech-Ed, and BFSI sectors.

WORK EXPERIENCE

SENIOR JAVA FULLSTACK DEVELOPER

BayOne Techno Advisors,Pvt Ltd | Oct 2024 – Apr 2026

Client: Albertsons Companies, Inc.
State-of-the-art platform catering to individual needs through Deep Learning to provide a personalized shopping experience.

- Developed a **dynamic configuration engine** that leverages RESTful APIs to deliver real-time personalized product recommendations based on historical consumer data, enhancing user engagement.
- Leading **System Design** for low-latency REST endpoints to serve personalized content flows.
- Designed and developed **model-serving APIs** using **Spring and FastAPI** microservices to optimize **distributed system** response times.
- Enabled **A/B experimentation** via configuration-driven platform supporting dynamic model strategies, segmentation, and campaign execution.
- Introduced **Prometheus** configurations to track performance metrics, visualized through **Grafana** dashboards.

PRODUCT DEVELOPMENT ENGINEER II

Calibo India Pvt Ltd | Apr 2021 – Oct 2024

Project: LAZSA Platform (PPaaS Architecture)
Orchestrating data-innovation journeys through unified digital solutions.

- Engineered robust **NiFi Data Pipelines** for real-time Kafka, Snowflake, Hadoop, and MySQL integrations.
- Containerized **Metabase** and **Open-Refine** using Docker for scalable visualization and data transformation.
- Implemented **AWS S3** integration using SDK and high-impact analytics using **Qlik-Sense**.
- Developed **Python** wheel packages and notebook templates for Databricks and Kinesis Stream processing.
- Enhanced application security posture by neutralizing high-risk vulnerabilities via automated **Snyk** audits.

SENIOR ENGINEER

Altimetrik India Pvt Ltd | July 2015 – Mar 2021

Integrated Business Development Platform (BDP)
Low Code/No Code platform for Developer Productivity.

- Worked on Agile Integration using JIRA and Trello APIs.
- Integrated Metabase and Qlik Sense for dashboard visualization.
- Developed DevOps pipelines using Jenkins CI/CD and deployed microservices in EKS Clusters.

Playground (HRMS)
Talent grooming and transformational initiative platform.

- Created orchestration layers in Node.js to bridge UI and backend services.
- Integrated AWS SDK and SDFC Sandbox APIs for cloud workspace management.
- Optimized developer productivity by provisioning cloud-based workspaces using AWS Workspaces and Eclipse CHE, reducing local hardware dependency.

Platform-API E&M (RESTful Services)
Microservices architecture with Spring Boot & Neo4j.

- Integrated Phabricator for Git functionalities.
- Built components with Spring Boot microservices and Neo4j Graph DB.

AltiFin - Paysa (BFSI Remittance)
Remittance application for rural populations.

- Integrated with RBL and Axis Bank APIs for fund transfers.
- Developed Angular components for interaction with REST services.

Recognition

- **Customer Focus Champion** Award at BayOne (Albertsons)
- **Gem Award** for outstanding platform contribution at Calibo
- Multiple **Inspire & Integrity** Awards at Altimetrik

Highlights

- **International:** Visited Uruguay for strategy meets & peer-programming
- **Innovation:** Winner of College Hackathon for Organ Donation App
- **Tech-Savvy:** Early adopter of AI tools (GitHub Copilot) for architecture
